Bloxks Pay

Comparison · RevenueCat, Superwall, Adapty

What Bloxks Pay does for you

You add subscriptions and purchases to your app from your chat. No developer, no technical knowledge needed: the AI does it all in front of you.

No developer

You do it all yourself, on your own.

No know-how

No code, no Apple or Google settings.

All in your chat

You describe, the AI builds, you approve.

Painless testing

2 clicks in the preview, no Apple test account, no build. You watch your app unlock.

We handle refunds

When a customer asks for a refund, Bloxks Pay answers Apple for you.

Real security

Every purchase checked with Apple and Google, your keys encrypted, automatic rollback.

1

Bloxks Pay vs the others

	Bloxks Pay	RevenueCat	Superwall	Adapty
Developer	Not needed	Required	Required	Required
Apple and Google settings	By the AI	Up to you	Up to you	Up to you
Test a purchase	2 clicks	8 steps	9 steps	19 steps
Price	1% from $1,000	1% from $2,500	1% + add-ons	1% + add-ons
Year-one total*	**$720**	**$1,520**	**$3,188**	**$1,664**

* App earning $6,000 a month, translated paywalls and refunds handled, setup estimated at 2 developer days. Public prices as of Nov 13, 2026.

Describe your offer to the AI, it handles the rest. bloxks.app/pay ↗

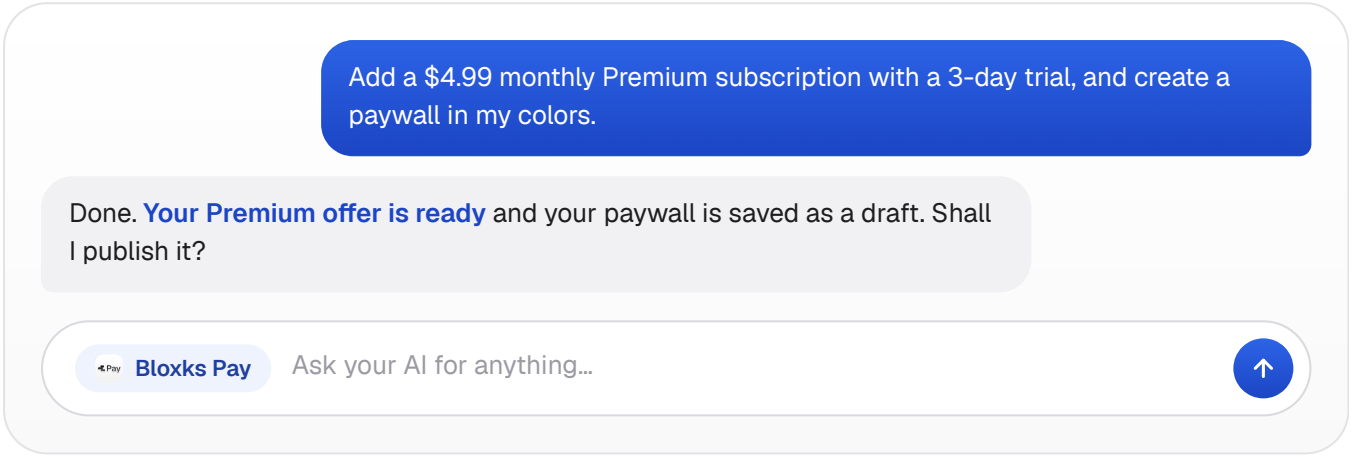
Bloxks Pay

MCP connector

Or run it from your AI

Bloxks Pay has its own MCP connector. Plug in the AI you already use and ask for what you want, like you would a friend. It does it for you, hands-off.

Claude · Claude Code · ChatGPT · Cursor · Codex



2

What your AI can do for you

- Connect your app
- Create your offers
- Build your paywall
- Start an A/B test
- Read your sales
- Roll back

3

Connect your AI in 3 steps

1

Add the connector

In ChatGPT, Claude, Cursor or Codex, in one click or a copy-paste.

2

Authorise your account

A Bloxks Pay page opens: you see what the tool can do and you accept.

3

Ask for anything

Your AI sets up purchases and builds your paywall, even if your app wasn't made with Bloxks.
